Ryder's Cove Town Landing is an existing boat ramp and bulkhead providing public access to Pleasant Bay through Ryder's Cove. The proposed maintenance dredging will remove approximately 40 cubic yards of accumulated sediment adjacent to the bulkhead and bring the area back to its originally and licensed depth of -2 feet Mean Low Water.

The dredged material will be distributed over 400 square feet of on-site Coastal Beach, above the Mean High Water level. The proposed work is maintenance dredging around an existing facility and entirely within the footprint of the original license.

In addition, the existing float system is to be expanded with the addition of two 8' x 20' seasonal, pipe-supported floats.
